

ANGULAR JS C# .NET FRAMEWORK WPF

OMICRON. Our 750 experts in 24 offices worldwide build the smartest testing, diagnostic, and monitoring solutions. Energy suppliers and industrial companies in more than 160 countries rely on our solutions to make the generation, transmission and distribution of electricity safe and reliable. Trust, respect and fairness have remained important values in our daily work for 30 years.

Our developer team for one of our software solutions is growing and is looking for a new team member as

C#/.NET and Web-Developer (m/f)

Your team: We are a team of 3 women and 7 men and we are looking for a person who shares our passion to create excellent solutions for our customers. The benefit for your work is not only your salary, but the great feel when our customers talk about our solutions.

Your tasks

- you are responsible for design and development of software parts as well as for software quality including unit tests, integration and automation tests
- in our team, you work on implementation, test, documentation and maintenance of web applications
- installing, updating and maintaining our customer's software solutions on-site complete your tasks
- with your ideas, you actively contribute to the further development of our products

Your profile

- you have completed your studies in Computer Science or a comparable education
- you have knowledge in one or more of the following areas: WPF, ASP.NET Core and Angular JS
- you are familiar with software architecture, design patterns, SQL server and REST services
- you like to work independently, self-responsible and you proactively
- you are an open-minded, flexible and team-oriented person
- you are used to communicate in English, German is an advantage

If that sounds like a task that is designed for you – then apply via www.omicron.jobs!
