

Kuenz technology creates first class solutions and offers services worldwide in the fields of container cranes, custom cranes, and the hydro power industry. Our team combines passion for innovation and committed working relationships, which promote mutual success. By joining the Kuenz team, you can be a part of this success.

In order to strengthen our teams, Kuenz Austria currently is searching for a dynamic personality to fill the following position:

FULL STACK SOFTWARE ENGINEER - FOCUS ON BIG DATA (M/F/D)

WHAT ARE YOUR RESPONSIBILITIES

- You will be an important part of our Analytics Team improving our IIoT solution.
- As a subject matter expert for back-end domains you will be actively participating in the future development of our Big Data platform.
- As a senior front-end developer at Kuenz you will be responsible for our Analytics Platform.
- To do so you will be supported by our DevOps team.

WHAT WE ARE LOOKING FOR

- You bring several years of professional experience in software development.
- You have a good command of C#, .Net or .Net Core, HTML5, CSS3, JavaScript and React.
- You got basic knowledge in running Unit Tests (xUnit Framework), SQL and Docker.
- You convince with analytical thinking, independent and responsible working methods.
- Nice to have: Experience with Selenium, React/Angular, Java

WHAT MAKES US DIFFERENT

- We are technology leader in our industry. Many of our products are unique.
- You work in an international company with a familiar atmosphere.
- We are open for new ideas. Only those who try the impossible will achieve the possible.
- Flexibility is our daily routine. You use our flextime model and also the possibility to work from home.
- Additional benefits such as lunch allowance complement our job offer.
